

# LEADING RESEARCH AND INNOVATION IN SINGAPORE AND ASIA

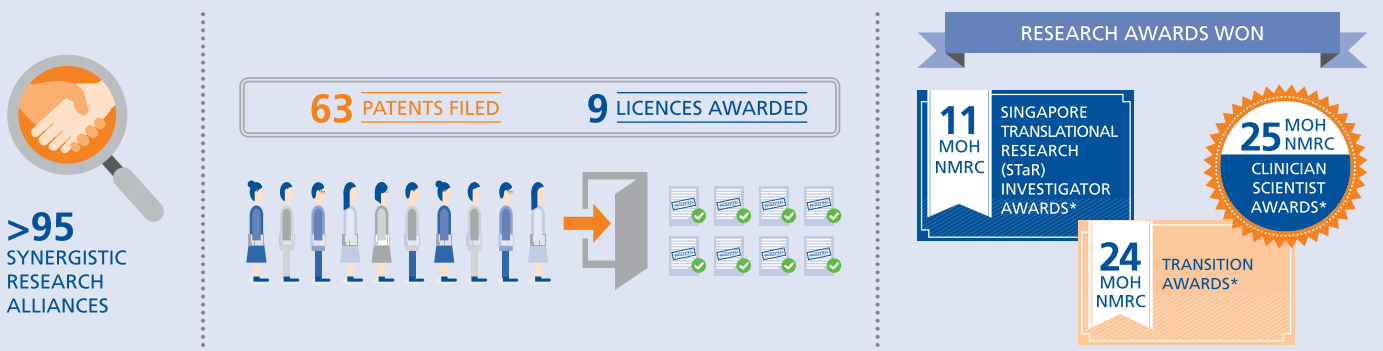

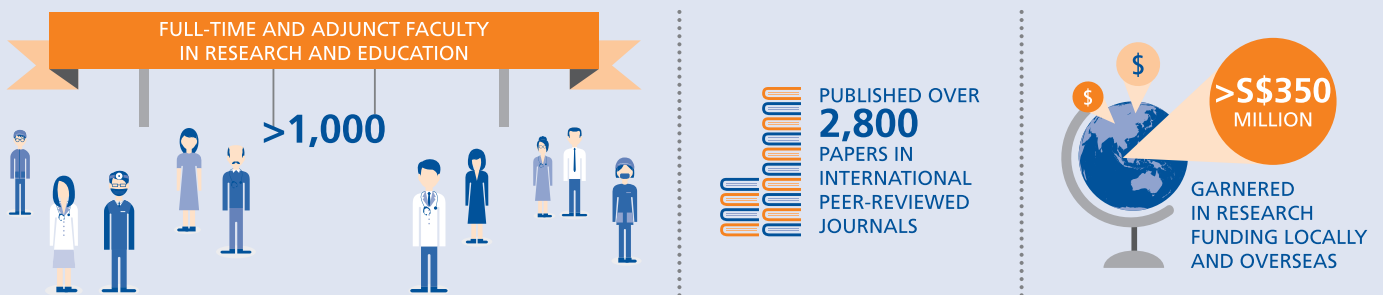

Backed by world-renowned Duke University and the National University of Singapore, Duke-NUS Medical School is a young, vibrant institution that punches above its weight.

Duke-NUS' international reputation in biomedical research and medical education has grown exponentially since 2005. Furthermore, its partnership with the collective clinical strengths of Singapore's largest healthcare provider, SingHealth creates a dynamic scholarly community for new discoveries, learning and care innovations which ultimately benefit patients.

With over S\$350 million clinched in research funding, numerous research awards won and more than 2,800 papers published, our numbers speak for themselves. Opportunities to do meaningful biomedical, translational or clinical research at Duke-NUS have never been better.
